

GRASSROOTS THEOLOGY

Elemental Trinity and the “Fullness of Four”

Steve B. calls attention to the “archetypal wholeness” of four and the incompleteness of three. *Divine Hypostasis* is incomplete except for the hypostasis of the divine feminine. See: <http://www.gather.com/viewArticle.action?articleId=281474978495563>

Carbon, hydrogen and oxygen, bread and bone, we belong to each other, we belong to nature. Needles of light stitch the vapor fabric with strands whose ardor is love, the Heart of the Mystery — the **DIVINICOR**. See: <http://www.divinicom.com>

Oneness of heart threads the purpose of bread and bone; Eucharist is the fabric of purpose that cannot be denied of natural light captured in cell batteries of chlorophyll by first symbionts. See: <http://www.secondenlightenment.org/The%20Evolution%20of%20Symbiosis.pdf>

The enlightenment of purpose is colored green — the signal color of *divinity consciousness* and the destiny of purpose that enfolds all. Elemental symbiosis is Eucharistic purpose, the “archetypal wholeness” of four: light, carbon, hydrogen and oxygen. Elemental vapors become “liquid light” — essential feminine consciousness. Purpose is the radical consciousness of Divine Communication; radical human / divine hypostasis is open Wisdom — **Minerva’s Owl** — the metaphor of Soul / Conscience. See: <http://www.authorhouse.com/BookStore/LargeCover.aspx?bookid=72719>
